Deadline for manuscript submissions:

**30 June 2024**

### Message from the Guest Editors

Dear Colleagues,

In complex socio-ecological systems, human well-being and sustainable development of society ultimately depend on the ecosystem services provided by nature. The spatial mismatch of the supply, flow, and demand of ecosystem services, such as food supply, flood regulation, and carbon sequestration, can have a non-negligible impact on the sustainable development of human society. At the same time, there are large differences between different regional and spatial scales in decision-making strategies for natural capital management, conservation, and planning. Therefore, there is an urgent need to address the challenge of disconnected policies at multiple scales from the perspective of differences in strategic objectives.

It is essential to integrate ecosystem services into decision-making. Recent ecosystem services-related research aims to inform multiple policy sectors, but only a very small number of studies clearly address a particular policy. To bridge the science-policy gap at this level, assessment of decision effects from the perspective of human well-being and social sustainability is needed to better meet the requirements of decision makers.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPLus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
