Department of Computer Science, Fluminense Federal University, Niteroi, RJ 24220-900, Brazil

Deadline for manuscript submissions:

closed (25 May 2022)

## **Message from the Guest Editors**

Dear Colleagues,

This Special Issue seeks to answer several questions. The first question is whether sustainability is already considered, or not yet, a foreground system quality attribute, at the same level of importance as other traditional quality attributes. The second question is at what levels sustainability is being integrated in software engineering, for instance, through the definition of green middleware, application containers, virtualization software or deployment algorithms. Finally, how and to what degree are systems for massive data processing incorporating techniques that optimize energy consumption? We can certainly say that the topics covered by this Special Issue already considered in the literature, where sustainability is now influencing all aspects of system development. However, it is not yet clear how these initiatives and approaches raised at the research level are being successfully translated to industrial software projects, in the practice, or what would really make a difference in our society toward a more sustainable future. All the topics in the special issue are in the context of these emergent systems.

## **Editor-in-Chief**

### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

# **Message from the Editor-in-Chief**

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
