Message from the Guest Editor

This Special Issue aims at attaining a better understanding of the factors determining the environmental behaviors and decisions of individuals and social systems at the levels of groups, organizations, and communities. The further development and application of behavioral and collective decision making models and the investigation of viable approaches to improve behaviors and decisions through transdisciplinarity, mutual learning and cooperation, collective problem-solving and participation, as well as through environmental campaigns and education for environmental citizenship are special foci of this Special Issue.
