Message from the Guest Editors

Dear Colleagues,

Today, urban agriculture is recognized as being present in urban agglomerations as well as in rural–urban fringes. When we analyze these areas, there is a multitude of environments in these urban areas both in developed countries and in developing countries. There is also a multitude of different types of food production in these urban areas ranging from community gardens and other types of gardens to urban farms with a hectare or two to much larger farms. These different forms of food production also have different types of relationships with consumers. The range of different types of food production units raises a significant question regarding how sustainable and healthy the food production is in this variety of environments. We are therefore interested in articles that investigate the degree of healthiness of food and the sustainability of its production in these different environments in urban areas, and how consumers have and can become involved in contributing to healthy and sustainable food production.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many other databases.

Journal Rank: [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
