Message from the Guest Editors

The aim of this Special Issue is to provide a platform for the in-depth exploration, discussion, and dissemination of research findings in the fields of wastewater treatment and of the protection and restoration of the ecological water environment. It aims to connect these research areas with the broader scope of the journal. Through addressing water-related issues, this Special Issue aligns with the journal's interests in environmental sciences, ecology, and sustainable resource management. It seeks to contribute to the journal's mission of advancing scientific knowledge and practical solutions in water resource management and environmental protection.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

1. Innovative wastewater treatment technologies;
2. Biodiversity conservation in aquatic ecosystems;
3. Water quality monitoring and management;
4. Ecosystem rehabilitation and restoration;
5. Sustainable water resource management;
6. Impact of anthropogenic activities.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
