Message from the Guest Editor

This Special Issue aims to contribute to investigating the role of gas and the gas industry in paving the way towards a low carbon energy future, and in attaining sustainable energy security, with a critical lens.

This emerging new energy order will also expand the pillars of the traditional energy security calculus. The transition towards a low carbon energy future will be ensured not only by combining policies and technology, but also by how fast and successfully the gas industry will adapt itself to the new reality across the gas value chain.

Keywords

- natural gas
- LNG
- decarbonised gases
- renewable gases
- sustainable energy security

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
