IoT Data Processing and Analytics for Computational Sustainability

Guest Editors:

Dr. Byungchul Tak
Department of Computer Science and Engineering, Kyungpook National University, Daegu, Korea

Dr. Young-kyoon Suh
Director of Data Engineering and Intelligence Lab (DEAL Lab), School of Computer Science & Engineering, Kyungpook National University, Daegu, Korea

Dr. Liqiang Wang
Department of Computer Science, University of Central Florida, Orlando, FL 32816, USA

Deadline for manuscript submissions:
closed (30 September 2021)

Message from the Guest Editors

Dear Colleagues,

This Special Issue covers research and applications related to advancing computational sustainability, ranging from IoT, fog/edge computing, big data analytics for IoT data, the application of deep learning to sustainability, cloud management for IoT data, and algorithmic aspects of efficient sustainability data processing. In addition, innovative H/W design for enabling advanced computational sustainability and computation modeling are within its scope. Topics of interest include, but are not limited to:

- IoT for computational sustainability;
- Cloud infrastructure for computational sustainability;
- Application of deep learning for supporting IoT data analysis;
- New paradigm of sustainability data analytics;
- Real-world sustainability data analysis;
- Management of computing resources for computational sustainability;
- Parallel computing in computational sustainability;
- Monitoring and visualization methodologies and tools in sustainability;
- Data security for sustainability;
- Networking issues for collecting and distributing IoT data;
- Theory and algorithm for computational sustainability.

Special Issue

Editor-in-Chief

Prof. Dr. Marc A. Rosen
Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
