Message from the Guest Editors

Dear Colleagues,

In recent decades, the exponential growth of the world's population has been accompanied by accelerated processes of expansion of urban and agricultural frontiers on a global scale. These two processes are acting as drivers of land-use change, affecting all types of ecosystems.

The spatial structure of an ecosystem or landscape and the interrelationships of its internal components, together with its context (surrounding environment), its connectivity and its dynamics, will define its overall capacity to withstand disturbances and its subsequent recovery or adaptive response.

In this framework, we encourage authors whose studies are related to changes in land use, in any type of cultural landscape along a wide rural–urban gradient, and their effects on structure and functionality that affect their spatial resilience to different disturbances (anthropic or natural) to contribute to this Special Issue with research or review papers.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
