Message from the Guest Editors

Dear Colleagues,

The main scope of this Special Issue (SI) of *Sustainability* is to explore and evaluate both innovative and long-validated approaches applied for the hydrostratigraphic and geochemical characterization of coastal areas. The main goal of this Special Issue is to cover, without being limited to the following areas:

- Sedimentology and Stratigraphy of late Pleistocene–Holocene coastal plains;
- Hydrostratigraphic framework reconstruction;
- Hydrogeological modeling;
- Hydrogeochemical characterization: sampling techniques of water and gas, new and/or standard analytical methods for trace elements and elaboration approaches;
- Geostatistical analysis;
- Stable and radioactive isotopes studies;
- Environmental issues/impacts (also due to harmful levels of trace elements) linked to water resource exploitation and management;
- Geochemical modeling;
- Analysis of ground deformation by means of satellite remote sensing and subsidence assessment.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
