### Message from the Guest Editors

This Special Issue will deal with technology, policy, and organisational innovations in urban transport and mobility to make urban transport sustainable. It will feature ideas, projects, simulations, and real live demonstration results about urban transport innovations and their impacts in terms of sustainability. It will have an interdisciplinary approach and, unlike specialised journals which address one specific subject, this Special Issue will combine energy, automation, and communication technologies with infrastructural, organisational, and policy issues to cover the full extent of the epic challenge of making urban transport sustainable.

### Keywords

- sustainability
- urban transport
- vehicle automation
- battery electric vehicles
- transport services
- transport policies
