### Message from the Guest Editors

This Special Issue entitled “Sustainable Organic Materials used in the Construction Sector” covers various subjects related to the production of organic-based sustainable materials and their application in construction activities. Different sources of sustainable organic materials are screened, as well as their application in different construction sectors (buildings, roads, railways, airports, ports, tunnels, bridges), such as but not limited to cement concrete, asphalt concrete, wood, and hybrid materials. Since the use of such materials in civil construction engineering is an emerging field, literature reviews and state-of-art papers are highly appreciated.

Deadline for manuscript  
submissions:

**31 December 2021**

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Marc A. Rosen

Applied Science, University of  
Ontario Institute of Technology,  
Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many other databases.

**Journal Rank:** [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
