Deadline for manuscript submissions:

closed (30 April 2021)

Message from the Guest Editor

Dear Colleagues,

Population ageing is happening across the world, and at a faster pace in less economically developed countries than has ever been observed before. Across the globe, changes in demographic and socio-economic structures require the creation of new sustainable care models that are effective in enabling large segments of the society who are growing older to continue contributing to the economic and social dynamics of the society while ensuring meeting the care needs for those requiring support. At the core of long-term care provision is its workforce, where the provision of care is essentially a human activity relaying on relationship building, compassion and competency. Thus ensuring an adequate supply of well-trained and highly skilled care workforce becomes a priority within such systems. This special issue welcomes articles that addresses the concept of creating sustainable care from a global perspective.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
