Message from the Guest Editor

Dear Colleagues,

The journal Sustainability is preparing a new Special Issue entitled "Impact and Adaptation of Climate Change on Natural Ecosystems". This Special Issue aims to address a wide range of ecological phenomena and change processes affecting land, marine, and island ecosystems and biodiversity, from the population level to the landscape (region) level. In addition, we would like to share information by welcoming papers that reflect the research and achievements of world experts in society's efforts to respond and adapt to such changes, including nature-based solutions and innovative restoration.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: Restoring ecosystems; landscape ecology; adaptation and resilience; community-based solutions; environmental sustainability; and environmental ethics.

I look forward to receiving your contributions.
