submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

Nowadays, alkali-activated binders-based industrial and agricultural wastes have been introduced as environmental friendly materials with high durability performance. The Special Issue on "Alkali-Activated Concrete: A State of Art" focuses on the preparation and characterization of free cement concrete incorporating waste materials that should find use in specific engineering applications, especially in the building industry. It is worth noting that millions of tons of natural, industrial and agriculture wastes are dumped in landfills every year. These waste materials cause severe ecological setbacks such as air contamination and leach out of hazardous substances. Using these wastes in alkali-activated concrete is a key part of decreasing present-day waste. The alkali-activated concrete industry saves natural resources and has a positive influence on cost savings and environmental protection.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
