Message from the Guest Editors

Dear Colleagues,

Present economic, societal, and ecological challenges require addressing urgently, as the consequences for the next generations will be disastrous if ignored. Therefore, the future's legacy should be a system of new and sustainable solutions. For this Special Issue, topics of interest consider subjects such as innovation, waste management, new economic and ecological systems, smart consumption, production, business strategies, green public procurement, and agile management. Moreover, acceptance imposes conditions for the adoption of a circular thinking model, such as a circular economy, and the implementation of sustainable solutions such as such an economy, eliminating the concept of waste, and simultaneously changing how the economy produces goods and what society and the economy consume.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
