### Message from the Guest Editors

Dear Colleague,

The focus of this Special Issue will be research on the sustainable provision of transport services and infrastructure which specially address climate change issues. Its scope includes theoretical modelling approaches and empirical studies associated with the financing, design, construction, maintenance, and management of transport services and infrastructure that address the impacts of climate change on the sustainable provision of transportation.

The impacts of climate change are a major concern on the provision of reliable, affordable, and safe transportation now and into the future and therefore the Special Issue seeks to inform the research community and practitioners alike of cutting edge research into the climate resilience of transportation.

Dr. Michael Burrow  
Dr. Gurmel Ghataora  
Dr. Mehran Eskandari Torbaghan

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many other databases.

**Journal Rank:** [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
