Department of Computer, Control and Management Engineering Sapienza University of Rome, Via Ariosto 25, 00185 Rome, Italy

Deadline for manuscript submissions:
closed (16 June 2021)

Message from the Guest Editor

COVID-19 has shocked our lifestyle with a pandemic period in which socio-economic paradigms have been substantially modified. Public, private and academic sectors are called to cooperate with actions needed to satisfy not only human needs, but also to favour a correct use of natural resources. No one can nowadays act on the global market without having a clear perspective and strategy about the environment, but we can encourage a sustainable revolution to provide a cleaner world. In addition, there is the opportunity to realize a great plan of green infrastructures, coupled with the maintenance of the existing ones, to support the planet's rebirth after COVID-19. The application of circular and green practices have a direct impact on response and recovery of infrastructure; that is one of the four components of resilience in addition to resistance, reliability, and redundancy. Both resilience and sustainability are viewed as distinct concepts, but are positively correlated. This Special Issue aims to investigate the relationship between these two topics. Theoretical, methodological and practical studies are welcome in this issue.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
