submissions:

31 March 2022

Message from the Guest Editors

Dear Colleagues,

With the recent progress in numerical methods and available computational resources, the role of numerical modelling in the design process of energy conversion systems has become more prominent. Numerical modelling provides detailed information on the underlying complexities of coupled phenomena in energy conversion processes that are not otherwise readily accessible with experimental measurements. Taking advantage of AI and machine learning approaches, the accessibility, validity, and trustworthiness of numerical models are improving. At the same time, improvements in numerical methods decreases their computational cost. This has enhanced the role of numerical modelling in the overall design of more sustainable energy conversion systems. Therefore, the current Special Issue of Sustainability aims at being a place to report recent advances in numerical modeling of the field of energy conversion and sustainability...

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many other databases.

Journal Rank: [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
