Message from the Guest Editor

It is crucial for every country to promote energy efficient technologies and promote cleaner energy sources. Economics is a powerful and robust tool for analysing how policies can change human and institutional behavior to adopt such efficient technologies and cleaner energy sources to achieve sustainable energy use. In this Special Issue, the energy use is sustainable when access to energy is secured for all people while the way the energy is supplied mitigates the effects of energy use on the environment. This Special Issue is hoping to gather various studies using economics to analyze conditions to achieve such sustainable energy use and investigating an effective energy policy to achieve this goal. Papers focusing on this issue at local/national, regional or global levels are all welcomed.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many other databases.

Journal Rank: [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
