Landscape Architecture and  
Spatial Planning Group

Deadline for manuscript  
submissions:

**closed (15 October 2020)**

### Message from the Guest Editors

This Special Issue focuses on the transition that this involves: which combination of social and ecological changes should take place and how can we prepare ourselves for these changes? We should be very much aware of the local conditions that enable specific solutions, such as culture, the layout of a city, the quality of an embedding into the surroundings of the city, and existing policies. We are also curious about lessons learned and how they can be implemented elsewhere. Both aspects should be taken into account in contributions to this Special Issue. Papers discussing emerging green practices that address themes like liveability, food production, ecology, heat reduction, water retention, and combine the strengths of the involved stakeholders are very much welcomed. We are, therefore, interested in integrated, sustainable and green solutions for multiple socio-ecological problems in dense situations. In addition, we are interested in whether these practices comply with existing theories of sustainability transition processes?

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
