Suitable topics include but are not limited to the following:

- the roles that sustainability issues may have on the decision making and implementation processes of reshoring strategies (e.g., motivation, trigger, output, barrier, enabling factors)
- the role of voluntary international standards (e.g., carbon footprint, OHSAS) in relation to relocation initiatives
- the effects of sustainability-based reshoring decisions on the development – or re-development – of a local supply chain
- the possible role of customer behavior in driving relocation decisions in specific industries (e.g., fashion)
- the possible role of home and host countries' public policies
- the role of stakeholders in the decision making and implementation processes of reshoring initiatives
- the impact of contingent factors (e.g., company size, industry) in influencing the relationship between relocation decision and sustainability
- the role of labour market legislation in the home and host countries
- the role of the entrepreneur in terms of sustainability perception and the connected relocation decision
