Deadline for manuscript  
submissions:

**closed (31 March 2022)**

### Message from the Guest Editor

Dear Colleagues,

The world is waking up in respect to the plastic pollution problem, and over the last five years, we have seen tremendous efforts to react to the rapidly growing problem. The idea of a circular economy and sustainability is now almost old news. However, significant research into new products, design methods, use, and disposal is still required. This Special Issue aims to bring together research into the adaption of design, manufacturing, and polymer material research for a sustainable, circular future. This includes research on transforming the linear plastics industry into a circular model and how materials scientists respond to this and covers a range of materials that fit into this, from redesigned recycled petrochemical materials to biological products and how these fit into the circular economy.

Assoc. Prof. Johan Verbeek

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
