## Recent Advances in Quantum Gravity

Guest Editor:

**Prof. Dr. Roberto Casadio**

Department of Physics and  
Astronomy, Alma Mater  
Studiorum Università di Bologna,  
Bologna, Italy

Deadline for manuscript  
submissions:

**closed (31 May 2021)**

### Message from the Guest Editor

This Special Issue is devoted to new and recent theoretical investigations aiming at understanding physical aspects of the fundamental gravitational interaction which should be relevant at the quantum level, both from top-down (mathematical methods and general theory to phenomenology) as well as bottom-up (studies of specific systems to general theory) approaches, and with applications to the astrophysics of very compact and exotic objects, black hole physics, and the issue of space-time singularities, gravitational wave production in black hole mergers, and cosmology of the early and present Universe.

## Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (*General Mathematics*); Q1 (*Physics and Astronomy*); Q1 (*Computer Science*)
