## Message from the Guest Editors

Dear Colleagues,

Mobile computing has emerged as a hot topic in the information technology domain due to the noteworthy advantages it brings with respect to connectivity, computing, and mobility. Even though recent advances in the critical aspects of mobile computing such as communication, portability, and mobility are promising, it is also evident that more practical solutions are required to deal with the security facets so that the same can be accommodated well with the current technology trends. This Special Issue welcomes state-of-the-art and high-quality research works describing practical and theoretical solutions on mobile computing, wireless networks, and security.

Potential topics include but are not limited to:

- Secure mobile computing and wireless network architectures and services;
- Security, privacy, and trustworthiness in wireless and mobile computing systems;
- Security-based energy aware wireless and mobile computing systems;
- Algorithm or protocol design for secure computing systems;
- Security applications of wireless networks and mobile computing;
- Resource discovery, portability, and migration in secure mobile computing systems.

# Special Issue

## Editor-in-Chief

**Prof. Dr. Manoj Gupta**
Materials Group, Department of
Mechanical Engineering, National
University of Singapore, 9

## Message from the Editor-in-Chief

*Technologies*, provides a single focus for reporting on developments of all technologies, regardless of their application. It is our intention that *Technologies* becomes the journal of choice for both researchers wanting to publish their work and technologists wishing to exploit the high quality research across a wide range of potential applications. Through its open access policy, its quick publication cycle, *Technologies* will facilitate the rapid uptake and development of the research presented, ultimately providing benefit to the wider society.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.
**High Visibility:** indexed within ESCI (Web of Science), Scopus, Inspec, INSPIRE, and other databases.
**Journal Rank:** CiteScore - Q1 (*Computer Science (miscellaneous)*)
