### Message from the Guest Editor

EDCs are defined as exogenous substances resulting in perturbations of the endocrine system and consequently cause adverse health effects in an intact organism, or its progeny, or in (sub)populations. Exposure to EDCs is especially hazardous during certain periods of development and has a strong influence on health throughout the whole life course. Given the above, there is a need to strengthen knowledge about EDCs in mixtures and alone; to improve methods of testing that enable the identification of EDCs; to find the most effective ways of reducing exposure and, thereby, vulnerability to disease; to collect data from areas that have not been sufficiently surveyed; to create environments that promote and enable scientific progress, innovation, and disease prevention; and to promote research aimed at better understanding exposure to EDCs and their relation to adverse health outcomes. Based on the above, a better understanding of both exposure to EDCs, as well the health effects posed by EDCs is necessary. In this sense, manuscripts that provide new knowledge on advanced exposure and health risk assessment are more than welcomed in this Special Issue.

## Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Toxicology) / CiteScore - Q2 (*Chemical Health and Safety*)
