Dr. Chiara Gambardella

Institute for the Study of
Anthropic Impacts and
Sustainability in the Marine
Environment, National Research
Council, Genova 16149, Italy

Deadline for manuscript
submissions:

closed (31 July 2022)

Message from the Guest Editors

We would like to introduce a Special Issue on the toxicology, ecotoxicology, and environmental chemistry of nanomaterials to summarize the current knowledge on the risks and benefits of nanoscale materials, including nanoparticles and nanoplastics. Nanomaterials are emerging contaminants that are continuously released into the environment as a result of their extensive use in industry, medical care, and consumer goods, to name a few. Significant progress on the measurement and management of the associated hazards and risks of nanomaterials is evident; however, there are many challenges ahead and controversies that need to be focalized in an ecological context. Knowledge transfer from toxicology, chemistry, and environmental sciences to ecotoxicology becomes a valuable tool for nano-related human and environmental risk assessment and management. For this Special Issue, we would like to collect the current knowledge of nanomaterials from an ecotoxicological perspective, which is understood to be a multi-disciplinary field that brings together and integrates the other disciplines cited above.

Original research articles, reviews, comments, and perspectives are all welcome.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q2 (*Chemical Health and Safety*)
