# **Plant Responses to Heavy Metal Toxicity**

Guest Editors:

### Prof. Dr. Miguel Pedro Mourato

Instituto Superior de Agronomia, Universidade de Lisboa, 1349-017 Lisbon, Portugal

#### Prof. Dr. Luisa Louro Martins

Instituto Superior de Agronomia, Universidade de Lisboa, Lisbon, Portugal

Deadline for manuscript submissions:

closed (30 June 2022)

# **Message from the Guest Editors**

Our society relies on different technological processes that use a large amount of different metals. Some of them can be considered as heavy metals, and anthropogenic activities like agriculture, mining, industry and transportation can release them to the environment, having a negative impact on plants and animals.

Some heavy metals are essential for life, usually in small amounts (Cu, Zn, Fe, etc), but can be toxic at high concentrations; meanwhile, others have no known biological function (e.g., Cd and Pb) and can thus be toxic even in small concentrations.

This Special Issue welcomes studies regarding the effect of all types of heavy metals (including rare earth elements)—both essential and non-essential—in all kinds of plants, including research in relation to uptake, tolerance, defence mechanisms, toxicity effects and food chain contamination. In this Special Issue both original research articles and reviews related to the topics above are welcome.

Department Environmental Chemistry, IDAEA-CSIC, Jordi Girona 18, 08034 Barcelona, Spain

## Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in Toxics when preparing your next paper.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Toxicology*) / CiteScore - Q2 (*Chemical Health and Safety*)
