Deadline for manuscript
submissions:

closed (30 November 2014)

Message from the Guest Editor

Dear Colleagues,

Plant toxins are natural products with many applications in agriculture and medicine. They have been useful in studies of ribosome and rRNA structure and function, cellular trafficking and programmed cell death. They have antiviral activity against plant and animal viruses, anti-cancer and immunosuppressive activity. Recent studies highlight the importance of developing antidotes and vaccines against these toxins. This special issue will be composed of papers exploring these areas. Reviews for this collection are on an invitation-only basis. Please discuss with Professor Tumer the ideas for a review.

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **CAPLus / SciFinder**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q1 (*Toxicology*)
