Drivers of Venom Potency across the Animal Kingdom

Guest Editor:

Dr. Kevin Healy

Zoology Department, Ryan
Institute, NUI Galway, Ireland

Deadline for manuscript
submissions:

closed (31 January 2022)

Message from the Guest Editor

Venom potency has long been a topic of interest to researchers from a wide range of fields. One driver of this interest is the diversity of organisms that have evolved venom, and with it, the wide variation in venom compositions that makes venom both a rich source of biodiscovery and a global public health issue. However, while varied, venoms have typically evolved to perform similar functional roles in predation and defence across phylogenetically distinct groups.

The focus of this Special Issue is to explore the factors that determine the potency of venom across the span of the Animal Kingdom. This includes questions relating to genetic, molecular, evolutionary and ecological factors associated with venom potency. Submissions linking factors that apply across a wide taxonomic range will be particularly favoured, and I also strongly encourage submissions covering neglected areas and taxonomic groups. I look forward to editing an exciting collection of research and review articles that will help to stimulate interest in the fundamental drivers of venom potency across the diversity of venomous animals.

Editor-in-Chief

Prof. Dr. Jay Fox

Department of Microbiology,
University of Virginia,
Charlottesville, VA, USA

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **CAPLus / SciFinder**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q1 (*Toxicology*)
