# **Coastal Urban Dynamics under Climate Change**

Guest Editors:

#### Prof. Dr. Jürgen Scheffran

Institute of Geography, University of Hamburg, 20144 Hamburg, Germany

## Dr. Dmitry V. Kovalevsky

Helmholtz-Zentrum Hereon, 21502 Geesthacht, Germany

#### Dr. Laurens M. Bouwer

Climate Service Center Germany (GERICS), Helmholtz-Zentrum Hereon, 20095 Geesthacht, Germany

Deadline for manuscript submissions:

closed (30 November 2023)

## **Message from the Guest Editors**

Dear Colleagues,

Urbanization processes, intensely felt on a global scale and involving a significant proportion of global population, are particularly pronounced in coastal zones. Rapid urbanization exacerbates the susceptibility of settlements to severe climate-related coastal hazards. Both urban dynamic trends and climate change effects should be considered in coastal vulnerability assessments, as well as urban and coastal spatial planning and management.

This Special Issue explores coastal urban dynamics under the influence of climate change and responses to adaptation challenges. The Guest Editors of this Special Issue encourage submissions with applications of qualitative and quantitative methods and descriptive and modeling studies across disciplines. Model-based research tackling these complex dynamics is particularly welcome, along with studies exploring how climate adaptation of coastal cities can be supported by coastal climate services.

# **Message from the Editor-in-Chief**

*Urban Science* is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of "science" includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the length of the papers.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science) and other databases.

Journal Rank: CiteScore - Q1 (Urban Studies)
