### Message from the Guest Editor

Dear Colleagues,

This Special Issue of Urban Science on “Urban Food Security” welcomes articles that deal with these different aspects of Food Security. At the same time, the Special Issue also welcomes articles which present analyses of how different issues are being dealt with, such as through developing more sustainable foodstuffs from both the point of view of consumers (and human health) and the environment. From the perspective of the changing values of consumers, the Special Issue is also interested in how consumers and producers can work together to produce more sustainable foodstuffs.
