Message from the Guest Editors

For this Special Issue, we invite contributions on ASF research in Africa that will allow for a better understanding of the multiple genotypes of the virus to improve diagnostics and control on the continent; the immune response and genetic make-up of African domestic pigs and wild host reservoirs and vectors of the virus; and pig production systems, value chains, and socio-economic issues and their role in the maintenance and spread of ASF. While research on pigs focuses strongly on ASF due to the global interest in the disease, other viral diseases are neglected. Some of these are (or may already be) present, while others are likely to emerge with increasing intensification of pig production. This special edition invites contributions on any existing research on other porcine viral diseases in Africa.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
