USA

Deadline for manuscript  
submissions:

**closed (20 November 2021)**

### Message from the Guest Editors

Dear Colleagues,

Following the success of the Special Issue “Endemic and Emerging Swine Viruses,” we are editing a 2021 edition of this very popular topic for new submissions.

Likewise, the main topic of this Special Issue is agriculturally important swine viruses that have an effect on swine production or overall swine health. This includes viruses that have recently caused outbreaks, for example, the African swine fever virus (ASFV) in Europe and Asia or the classical swine fever virus (CSFV) in Japan, which are causing devastating losses to the swine industry. Endemic swine viruses would include porcine reproductive and respiratory syndrome virus (PRRSV), porcine epidemic diarrhea virus (PEDV), porcine deltacoronavirus (PDCoV), swine influenza virus (SwIV), and foot-and-mouth disease virus (FMDV), Senecavirus A (SVA), Swine Influenza, Porcine Circovirus (PCV), Porcine Sapelovirus (PSV), Porcine Astrovirus (PAstV) or any other endemic or emerging porcine viruses.

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
