Viruses of Microbes 2020: The Latest Conquests on Viruses of Microbes

Guest Editors:

Dr. Tessa E.F. Quax

Biology of Archaea and Viruses,
Groningen Biomolecular
Sciences and Biotechnology
Institute, University of Groningen,
Groningen, The Netherlands

Dr. Marianne De Paepe

Micalis Institute, INRAE, Jouy-en-
Josas, France

Dr. Karin Holmfeldt

Department of Biology and
Environmental Sciences,
Linnaeus University, 391 82
Kalmar, Sweden

Deadline for manuscript
submissions:

closed (31 December 2020)

Message from the Guest Editors

The issue intends to be a platform for the latest advances on research of microbial viruses, from ecology and evolution, to virus structure and function, and from virus-host interaction to biotechnology applications and phage therapy.

We specifically invite researchers studying viruses of all three domains of life to submit their work. The special issue will cover the following topics:

- Ecology and evolution of microbial viruses
- Virus structures and function
- Virus-host interaction: overcoming cell barriers
- Virus-host interaction: molecular mechanisms
- Virus-host interaction: host defence and viral evasion mechanisms
- Agro-food, veterinary and environmental biotechnology applications
- Biotechnology applications in health care
- Current state and latest developments of phage therapy

We hope to collect series of research articles which will reflect the full diversity of this field with current and future trends of fundamental and applied research. ISVM members receive a 10% discount and a limited number of fee waivers is available. We would be happy if you contact us in advance by email about planned submissions.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
