University, Weihai, China

Deadline for manuscript
submissions:

closed (30 December 2022)

Today, the health of the aquatic environment is deteriorating due to various kinds of pollutants, changes in environmental factors, and their coupling effects. The aquatic environment, as an important component of the biosphere, has been termed “the ultimate sink” for traditional and emerging contaminants. Given the finite supply of water available, the continued chemical contamination of the aquatic environment may pose a significant environmental health hazard. We sincerely invite investigators to contribute original research articles as well as review articles that will stimulate the continuing efforts to understand the adverse effects and toxicological mechanisms of chemical contaminants (heavy metals, POPs, etc.) in an aquatic environment and encourage discussing the relationship between the toxic effects of environmental pollutants and changes in environmental factors [...]

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
