Deadline for manuscript  
submissions:

**25 September 2024**

### Message from the Guest Editor

Ever since 2002, when the first Conference on Sustainable Development of Energy, Water and Environment Systems (SDEWES) was held in Dubrovnik, the SDEWES Conference series has been providing a worldwide forum for scientists and those interested in sustainability to share the state of the art, future directions, and priorities in this field. SDEWES is dedicated to the advancement and dissemination of knowledge on methods, policies, and technologies for increasing the sustainability of development by de-coupling growth from the use of natural resources and by transitioning to a knowledge-based economy.

SDEWES has maintained high publishing standards, with more than 2500 research articles published in leading journals. MDPI's *Water* journal is pleased to support SDEWES by launching a Special Issue dedicated to the 2024 19th SDEWES Conference. This Special Issue seeks to provide an opportunity for researchers in a wide range of areas to originate, discuss, share, and disseminate new ideas. *Water* also offers a perfect platform for the interdisciplinary and multi-cultural evaluation of complex systems.

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Laboratory of Functional Ecology  
and Environment, Centre  
National de la Recherche  
Scientifique (CNRS), University of  
Toulouse, Campus ENSAT,  
Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
