Zooplankton Diversity and Pelagic Food Webs: Investigating Present and Past with Different Techniques

Guest Editors:

Dr. Roberta Piscia

Prof. Dr. Roberta Bettinetti

Dr. Barbara Leoni

Dr. Marina Marcella Manca

Deadline for manuscript submissions:
closed (23 December 2019)

Message from the Guest Editors

Dear Colleagues,

Zooplankton are of key importance in the structure and functioning of aquatic food webs. They contribute to a large part of the functional and structural biodiversity of predator and prey plankton communities. Promptly responding to long-term and seasonal changes in the physical and chemical environment, they are sensitive indicators of patterns and mechanisms of impact drivers, both natural and human-induced. In this volume, we aim at presenting evidence for both long-term and seasonal changes in zooplankton community structure and dynamics, investigating different approaches, from population dynamics to advanced molecular techniques and reconstructing past communities from subfossil remains in lake sediments.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.
Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
