Arsenic, Fluoride and Emerging Contaminants: Groundwater Quality and Water Security in the Indian Sub-Continent

Guest Editors: Message from the Guest Editors Prof. Dr. David Polya Dear Colleagues, Water security is a critical issue globally and particularly for Prof. Sudhakar Rao countries on the Indian sub-continent. Many of the **Prof. Saugata Datta** challenges being addressed relate to water supply and water quantity, but with an increasing reliance on Dr. Devanita Ghosh groundwater for both drinking water and agriculture, water Dr. Laura Richards quality is also a critical aspect of this challenge, as well as being identified as a key Sustainable Development Goal. Groundwaters in the Indian sub-continent have been variably impacted by geogenic arsenic, fluoride and Deadline for manuscript uranium as well as, particularly in shallow aquifers, by submissions: closed (15 October 2022) anthropogenic pollutants, notably emerging contaminants

Editor-in-Chief

Dr. Jean-Luc PROBST

ECOLAB, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. Water invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
