Message from the Guest Editors

This Special issue will address different actions that lead to the conservation of these ecosystems. Therefore, we invite papers focusing on the improvement of knowledge, the disclosure of effective practices to mitigate the anthropogenic threats, and the proposal of restoration solutions to enhance the resilience of aquatic ecosystems and contribute to aquatic biodiversity, as well as to ensure the ongoing provision of ecosystem services.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.
